Summary

Full-stack developer focused on TypeScript, React/Next.js, Python, and PostgreSQL, with a solid foundation in Linux and CI/CD.

Skills

Languages: JavaScript, TypeScript, Python, SQL, Bash
Frontend: React, Next.js, Tailwind CSS
Backend: FastAPI, Node.js, REST APIs
Databases: PostgreSQL, MySQL
Tools: Linux, Docker, Git, CI/CD, GitHub Actions
Testing: Playwright, Vitest

Projects

Issue Tracker 2026
Next.js · TypeScript · PostgreSQL · Prisma

- Built a full-stack issue tracker with authentication, authorization, issue assignment, filtering, sorting, and pagination.
- Developed a dashboard with issue statistics and insights, using React Query, React Hook Form, Zod, and Recharts.

Game Hub 2026
React · TypeScript · React Router · React Query · Zustand

- Built a game discovery app with search, filtering, sorting, infinite scrolling, and detailed game pages.
- Managed server and client state with React Query and Zustand, with caching, background refetching, and persistent UI preferences.

Experience

Web Developer Jun – Aug 2025
Internship at Enjoy Market SARL On-site

- Built end-to-end and unit tests with Playwright and Vitest, expanding coverage and improving frontend reliability.
- Developed a URL extraction and validation system with Playwright and curl (batch processing, deduplication, DNS-aware checks).

Education

Baccalauréat in Electrical Sciences & Technologies 2020 – 2021
Moulay Youssef Technical High School

Open Source

- Fixed Stockfish installation in *chess-tui* on Arch Linux by adding a `yay` fallback when unavailable via `pacman`; merged upstream with passing CI checks.
